EXPERIENCE

Freelance, IL — *Full Stack developer*

Fab 2024 - PRESENT

OptiMax (In Progress)- In collaboration with a team to develop a responsive website for managing the company's employees, creating and managing a personal profile, an employee management panel, uploading documents, task logs, submitting shifts, weekly work arrangements. I developed end-to-end features from the UI design to the backend, using React and Node.js frameworks and MongoDB Atlas for the cloud database.

- Developed UI designs into responsive web applications, written in React, HTML5, and CSS.
- Developed backend RESTful API with Node.js and integrated them with the UI.
- Implemented SMS and notification systems using Twilio SendGrid - RESTful APIS & SMTP libraries.
- Implemented user session management (authentication) with Node.js To perform authorization and authentication for users.

PROJECTS

- **Travel Agency Web Application:** Designed and developed a comprehensive website for booking flights, allowing users to select destinations, dates, flight hours, number of seats, and other preferences. using JavaScript for front-end and C# for back-end operations, with SQL Server for database management.
- **Pet Protected Web Application:** Designed and developed a website dedicated to second-hand products for animals, facilitating contributions from various associations and private individuals. using JavaScript, HTML, CSS for the front-end and Django for back-end operations with MySQL for database management. Deployment using Jenkins.
- **Warehouse Web Application:** Designed and developed a website serving as a digital inventory for the Visual Communication Department, facilitating the management and borrowing of all departmental equipment. using JavaScript, HTML, CSS for the front-end and C#(.Net) for back-end operations with MySQL for database management.
